

RZ Ecosystem Partner Solution Edge Impulse Studio Support for RZ/V2L and DRP-AI

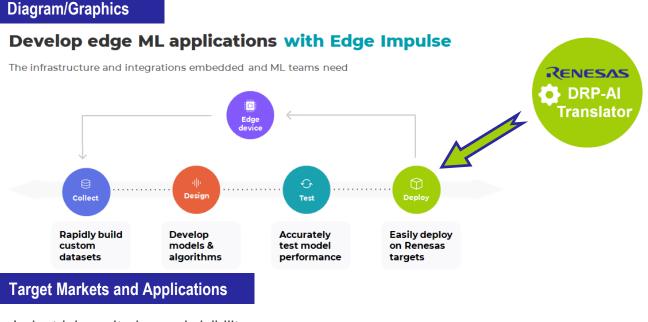

Solution Summary

Edge Impulse is an integrated cloud environment that enables end-to-end development of AI/ML solutions for embedded products. Edge Impulse Studio and APIs enable easy data collection and transformation, training, testing, verification and deployment of ML models for a wide range of industrial and consumer applications. Out-of-the-box support is now available for the <u>RZ/V2L</u> Evaluation Board Kit (EVK).

Features/Benefits

- Easily label event data collected directly from sensors to the RZ/V2L EVK.
- Optimize model hyperparameters for specific memory and latency requirements with Edge Impulse's EON Tuner[™] AutoML tool
- Easily deploy trained ML classification, regression and anomaly detection models based on environmental and inertial data
- DRP-AI Model Export, i.e., the DRP-AI translator is integrated to the Edge Impulse environment, no need to run this step externally

- Industrial monitoring and visibility
- Smart buildings
- Smart cities
- · Inspection and Vision use cases

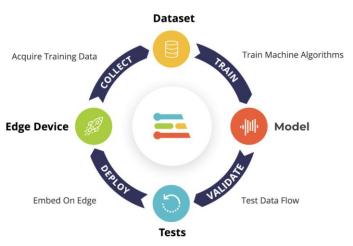

www.edgeimpulse.com

We put ML into real products.

Edge Impulse is the leading development platform for machine learning on edge devices, free for developers and trusted by enterprises.

Our platform and solutions offering allows for the training, testing and deployment of Al/ML algorithms to edge hardware including ultra-low power MCUs, MPUs and GPUs, across any data type.

How Edge Impulse solves top edge ML challenges for customers like these:

99% of sensor & device data is discarded	Accelerate next gen IoT products and solutions turning data from any edge device into actionable insights	ŌURA
Current ML tools are not designed for edge	Enable developers enterprise-wide to rapidly build ML solutions natively for edge devices, amplifying your ML experts	poly
87% of Al/ML projects fail due to infrastructure complexity	MLOps infrastructure from data collection to edge deployment, for enterprise data science and ML teams, with leading integrations	AD\ANTECH
Difficulties in building smart product experiences	Build innovative experiences with ML with ease, leading to growth and competitive differentiation	

Key differentiators:

Industrias

- · Low-to-no code platform does not require deep ML/AI expertise to use
- **Open source** no black box approach to algorithm development and no royalties
- **Deployment agnostic** run our algorithms on any edge hardware of choice, even older hardware in the field
- Sensor agnostic the platform can handle all types of data including sensor, audio and vision data
- **API driven** Connect Edge Impulse to any pre-existing data pipelines including AWS, Google Cloud and Azure

Applications

Trusted by enterprise customers globally, to get to market faster.
