## Sample Project of Real-Time OS RI78V4 for RL78 Family and 78K0R MCUs Updated

We have updated the sample project included with the real-time OS RI78V4 for the RL78 family and 78K0R MCUs.

---

### 1. Description

In the sample project included with real-time OS RI78V4, you cannot use the RAM parity-error detection function of the RL78 family MCU but in the updated one, you can use it.

Details of update:

To use this function, you need to initialize the stack area occupied by RI78V4 in advance. So, a function for initializing this area has been introduced into the sample project.

### 2. Updating Your Product

Online update is available free of charge. To update yours, download the update program of the product and its manual from:

[https://www.renesas.com/ri78v4\\_download](https://www.renesas.com/ri78v4_download)

Then follow the instructions on the manual to update yours.  
This Web site will be opened on this July 20.
