- Note 1: Quotation is based on lead\_free IPC 610C Class II workmanship standards.
- Note 2: Hardware is a "build to print" product.
- Note 3: QTA Solutions reserves the right to adjust its price if the AVL or documentation provided by the customer has to be modified.
- Note 4: Cost for ECN/ECO will be submitted to the customer upon completion of an impact analysis.
- Note 5: Includes MRP BOM Load, Receiving Inspection to AVL, Post build Physical Inventory, Consigned Material Storage, & Material Return.
- Note 6: Does not include Source Inspection. If a Source Inspection is performed customer will be billed any incurred cost
- Note 7: Requires parts sent to QTA Solutions for kitting in advance of the build, requires solder sample sent as part of the kit, requires XY data from board layout sent prior to assembly.
