

R-Car Proactive Partner Solution

SYSGO – ADAS Platform

Solution Summary

Apex.AI, Renesas, and SYSGO have joined forces to bring you a simpler solution for Software-Defined Vehicle built upon Renesas R-Car ECUs with SYSGO RTOS and hypervisor technology for mixed criticality. And Apex.AI's functionally safe Apex.AI and Apex.Ida products. The solution is automotive grade and ASIL D safety certified to speed your way to production.

Features/Benefits

Certifiable ROS 2 Stack: Partnership

Renesas (R-Car H3 board)
Apex.AI (Apex.Grace, LiDAR 3D perception)
SYSGO (PikeOS RTOS & Hypervisor)

SW-defined Smart Vehicle RTOS

Hard real-time, Safety certification up to ASIL D

Processing in Apex.Grace / ROS 2 Nodes

Multiple PikeOS partitions

ROS 2: Flexible, open-source SW platform

Tools, libraries, and algorithms to simplify creating complex behaviors of Robotic and Automotive platforms

Diagrams/Graphics

Target Markets and Applications

- Automotive
- Off highway
- Railway
