Simulator Debugger Customizing Kit I/O DLL Kit V.2.00 Released

We have released simulator debugger customizing Kit I/O DLL Kit V.2.00.

1. Descriptions

I/O DLL Kit V.2.00 supports the following simulator debuggers managed by High-performance Embedded Workshop in creating I/O DLLs:

- R32C simulator debugger V.1.00
for the R32C/100 series
- M32C simulator debugger V.1.00 through V.1.03
for the M32C/80 and M16C/80 series
- M16C R8C simulator debugger V.1.00 through V.1.03
for the M16C/60, /30, /20, /10, /Tiny, and R8C/Tiny series

I/O DLLs are the DLLs (Dynamic Link Libraries) operating in combination with the simulator engines of simulator debuggers.

For details of I/O DLL Kit V.2.00, visit the Web site at
http://www.renesas.com/hew_iodllkit

This site will be opened on and after September 21.
The above URL is that of our global site (in English).

When you are using M3T-PD32RSIM, the simulator debugger for the M32R family; or M3T-PD308SIM or M3T-PD30SIM, both the discontinued products of the simulator debugger for the M16C family, run it with I/O DLL Kit V.1.20.

For information on I/O DLL Kit V.1.20, see its datasheets on the Web site.

The Web site is that of our global site (in English).

NOTICE:

I/O DLL Kit is distributed free of charge under the condition that no

technical support is provided. So please aware that we are not able to answer any inquiries about it in some cases.

2. How to Acquire the Product

Download the installer of I/O DLL Kit V.2.00 from the Web site and execute it.

This site will be available on and after September 21.

The Web site is that of our global site (in English).
